

FIXED DEPOSIT INTEREST CALCULATOR

PROBLEM STATEMENT

Need to automate the following activities using Selenium + Java.

Key Activities to implement:

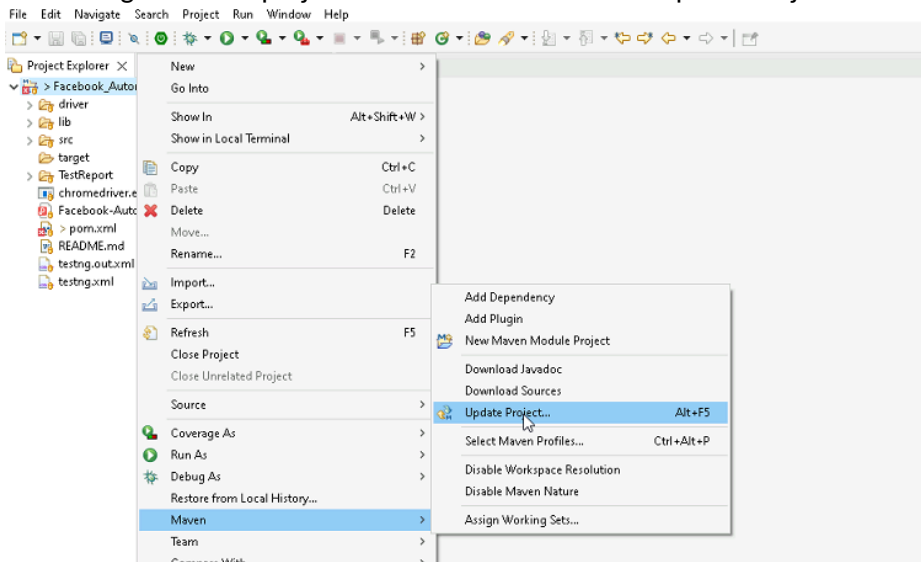

SN	Test Steps
1	Navigate to "Fixed Deposit Interest Calculator" sub-menu from "Personal Finance" Menu.
2	Enter Investment amount.
3	Enter Investment period.
4	Enter rate of return.
5	Select interest frequency.
6	Enter tax rate.
7	Fetch total interest.
8	Fetch total payment.
9	Fetch total corpus.
10	Fetch tax amount.

NOTE: "Please do not delete any file in the src folder. But you are free to add any other file".

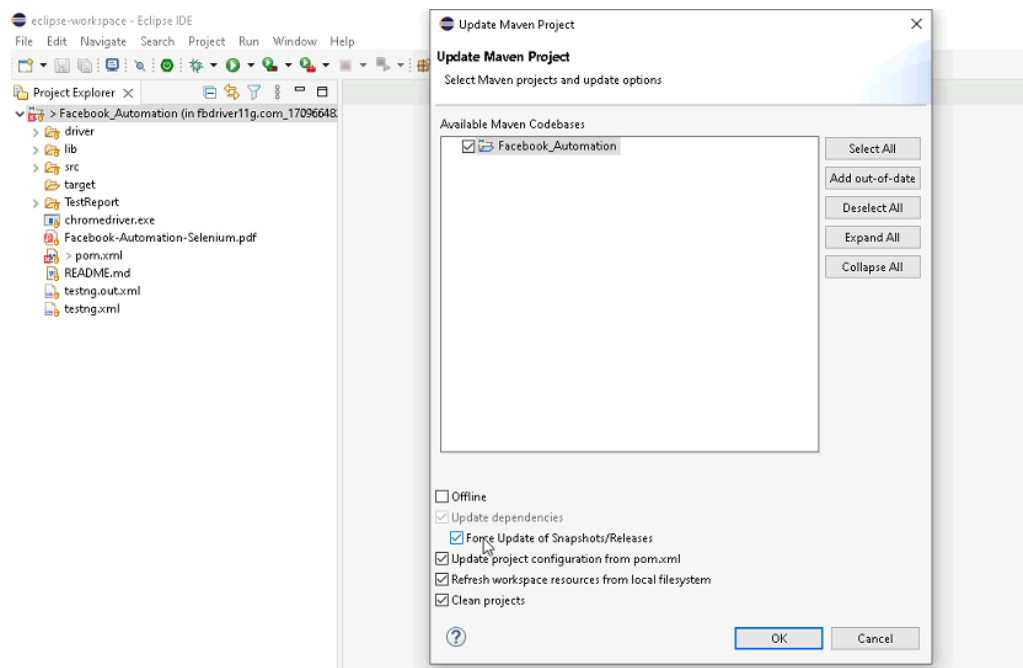

Pre-requisite:

As soon as you import project in eclipse, update the project using maven update option as below. This is to resolve issue if any maven dependency not downloaded properly:

1. Right click on project : Go to “Maven” : Select “Update Project”

2. In Update Maven Project Box Select “Force Update of Snapshots/Releases” and click OK

Template Code Structure: Packages and files you will be required to work upon. Other Files and packages you can ignore.

Package	Class/File	Description
pages	Fixed_Deposit_Interest_Calculator_L1_Pages.java	<ol style="list-style-type: none">1. All core activities (mentioned in list above) to be performed here.2. The comments associated with each templated method here describe the expectation.3. You can define locators and xpath here.4. Declare any variable/object you need to share data/status between different methods.5. Do not modify the signature of methods declared here.6. You can create additional supportive common methods in CommonEvents class.

Expectations:

- 1) Learners should write automation script using Java and selenium to automate all the steps in the above question. In other words, automation script should perform all mentioned steps.
- 2) Learners should not use any tools to create the xpath. They should develop the xpath/cssselector on their own.

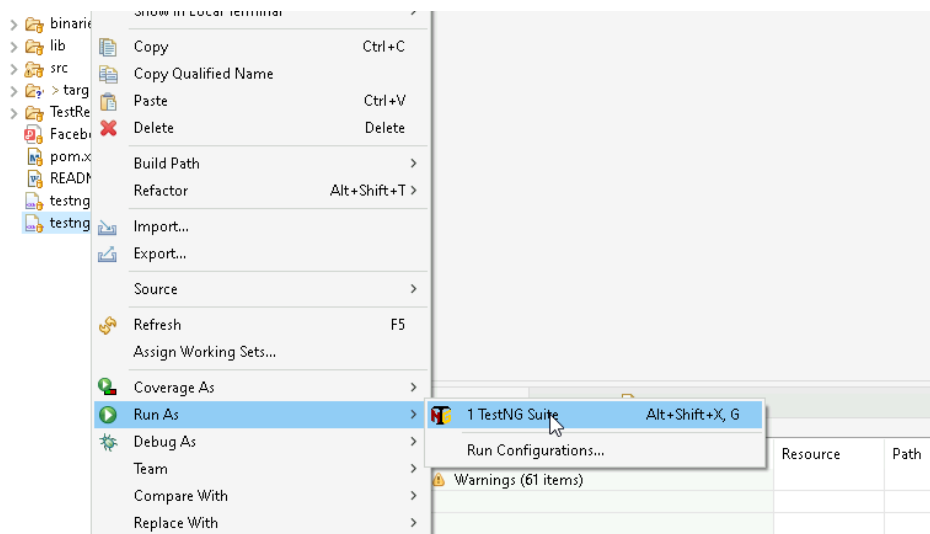

IMPLEMENTATION/FUNCTIONAL REQUIREMENT

1.1 CODE QUALITY/OPTIMIZATIONS

1. Associates should have written clean code that is readable.
2. Associates need to follow SOLID programming principles.

EXECUTION STEPS TO FOLLOW

1. **You are mandatory required to run test cases for applications before final submission. Without which project evaluation will not happen.**
2. **You can launch test cases any time as follows: Right click on testng.xml and run TestNGSuite**

3. Before final submission, you are also required to push your code to GIT. Following are the steps to follow:

Right click in folder and open Git Bash

Fixed Deposit Interest Calculator

In Git bash terminal, run following commands

- git status
- git add .
- git commit -m "First commit"
(You can provide any message every time you commit)
- git push
